THERE was a quarrel in the stone-shop of the Maryland penitentiary the other evening between two negro convicts named James Smith and Wm. Madden. Finally Madden seized a large stone and hurled it at Smith, striking his target at the base of the skull. Smith died next morning. Madden was then put in irons and thrown into the dungeon. He will be tried for murder.

PARROTTSVILLE, Cooke County, Ga., is in a wild state of excitement over a frightful epidemic which has made its appearance there. The disease, which proves in every case fatal, resembles flux, except that the victims are attacked with severe pains in the head simultaneously with the pain in the abdomen. The physicians are unable to cope with the disease, and those stricken with it succumb within a short time, Twenty-seven deaths occurred within three days.

DEPUTY SHERIFF ADAIR, who was frightfully carved by John Smith, the other day, while the officer was in pursuit of six prisoners, who had escaped from the Hunt County (Tex.) jail, of which Smith was one, died three days afterward. Sentinels had been stationed for two days in different parts of Greenville to give the alarm as soon as Adair should die. One nour after Adair's death an armed mob was on the way to the jail. No resistance was offered. Smith was taken some distance from the city and hanged. The lynching was without incident, every thing passing off in an orderly way.

As the Nashville and Chattanooga pas senger train was nearing Chattanooga, the other night, and while running forty miles an hour, Marr Rankin, the Kentucky desperado, who had been captured in Arkansas, jumped from the train and escaped. Rankin was wanted for two murders, and there was a reward of \$500 for his arrest.

Austin Gross, of White's Creek, W. Va. was killed at Ashland, Ky., a few days ago by a railroad engine running over him. He was forty-seven and married.

THE Republicans of the Fourth Virginia District have nominated State Senator W. G. Gaines for Congress.

PAT BELL and James Simpson, colored, were hanged at Marion, Ark., for a murder committed in 1885.

GENERAL B. F. CHEETHAM died at Nashville, Tenn., a few days ago.

SAVANNAH, Ga., has a policeman who can sleep soundly while walking. The other night he slumbered through a heavy show er, and was much surprised when he awoke and found himself drenched.

KIRBY SMITH, Professor of Mathematics in the South and Tennessee, and D. H. Hill, late President of the Agricultural School of Alabama, are two of the three surviving Lieutenant Generals of the Sou

GENERAL WM. A. QUARLES, of Clarksville, Tenn., has been unanimously nomi. nated for the State Senate by the Democrats of Montgomery and Stewart counties. General Quarles was a member of the Tennessee Senate in 1875.

A DIFFICULTY occurred in Aberdeen, Miss., between Henry Roberts and Ben Popham, at the corner of Heiser's cotton warehouse the other evening, in which Roberts was shot four times and Popham received one shot in the knee. Roberts died in ten minutes. The cause of the trouble is not positively known.

Tue other night an immense barn belonging to Marshall Bate, six miles from Gallatin, Tenn., caught fire from some unknown cause and was burned to the ground. Seven head of horses, 400 bushels of wheat, 75 barrels of corn, 20,000 bundles of oats, several cows, several tons of hay, and all the farming implements were destroyed. While Mr. Bate was trying to save his stock the building fell in on him, severely burning him about the head, arms and legs. He barely escaped with his life. No insur-

A GLANCE at the "Postal Guide" reveals an odd collection of names. Georgia has Ball Ground, Hard Cash, Ty Ty, Jug Tavern, Enigma, Alligator, Pumpkin, Pay Up, Snapfinger and Hat. In Tennessee we find Sweet Lips, Defeated, Regret, Peanut, Quiz and Tut. West Virginia has Gin, Mud, Sammy and Left Hand. In Florida Sopchoppy looms into prominence. A senti-mental place in North Carolina is called Matrimony. Texas tempts fate with a Cyclone. Kentucky proudly claims Rabbit Hash, Jamboree and Cut Shin.

A SINGULAR case has just been concluded in Forsyth County (Ga.) Superior Court, in which one brother sent the other to the penitentiary. Some years ago John C. Nicholls and Dr. F. H. Nicholls, both men of means, came from New York and settled in that county. In time business troubles arose between them, when John C had the doctor indicted for larceny. After trial of, which he was convicted, he received as sentence one year in the penitentiary. Both men are gray-headed, being over sixty years of age.

THE other morning as Judge J. B. Elam and Joseph Nicholls were in consultation in the law office of the former at St. Joseph, La., Colonel V. L. Reeves stepped to the front door and fired the contents of both barrels of a shot-gun into the head and shoulders of Nicholls, killing him instantly. Reeves surrendered himself to the authorities, and was lodged in jail without bail. He claims to have acted in self-defense. N cholls was a son-in-law of Colonel Reeves, and some family trouble is supposed to have been the origin of the difficulty.

THE business men of Calboun, Ga., have made up a purse for the best yield of wheat as follows: For the best yield on one acre, \$15; second best yield on one acre, \$5; for best yield on five acres. \$15; second best yield on five acres, \$5, open to all farmers in Gordon County. This offer is made for the crop of 1887.

A LITTLE tornado whirled through Golds boro, N. C., the other day, and finding the front door of a fine residence open, dashed into the house, gathered up a lot of furniture, burst open a rear door, and flung the

whole lot in a beap in the back yard EDWARD PHILLIPS, cook on the steamer Scone, fell off the wharfboat at Charleston, W. Va., and was drowned,

HOW TO BE POPULAR. What People Want of Persons Who Move in Their Society.

Nothing can be more certain than that the happier, the luckier, the better dressed and the gayer you are, the more people like you. In romance you can throw yourselves into people's arms and tell them all your woes; but in real life you can't do it.

It is not that society does not wish to have miserable people in its whirl so much as that sad people are out of place tnere. A merry voice, a smiling face, a habit of praising the world rather than of blaming it, makes any one ac-ceptable. People who can set others laughing are popular. On the whole, no doleful person need to expect sympathy; it is too troublesome. Woebegone folks are not wanted. Even strong feeling, deep thought or fervid sentiment is troublesome in society. Light talk, agreeable chat, subjects that can not hurt any body's feelings are desired.

If you can manage to be amusing without being satirical, interested in every thing that is said without being personal, and to dress with good taste, even if you are poor, you will be popular. We are not sure that it is worth while to win what is neither love nor interest, but it is better than to be unpopular. And, in any event, the "doldrums," the exhibition of your empty purse, broken heart or poor health, will be against you.

When you have to be wretched-as, if you own a heart, you must-go away by yourself and cry. If you are poor, take your poverty into a dark corner where nobody will see it. And when you can no longer be well, go away and suffer in silence. As a general thing, all that the people want of you is to amuse them in some way, and if, in all the world, you have one friend who truly sympathizes with you in joy and sorrow, you have a rarer thing than the phœnix. At all events, remember that you can not bemoan yourself and be popular, even among your own next of kin.—Baptist Weekly.

Think of This Many people have neglected slight manifestations

Many people have neglected slight manifestations of humor in the blood till the foul matter has become so powerful as to cause terrible scrofulous sores, awful suffering, and, finally, as the system becomes drained of all its strength, death.

Some have neglected distress after eating, heartburn, occasional headaches, and other early symptoms of dyspepsia, till this painful disease has become incurable, and the victim barely sustains a miserable existence.

Others neglect that tired feeling pains in the

Others neglect that tired feeling, pains in the back, weakness, languor, till general debility and kidney or liver disease becomes firmly fixed upon kidney or liver disease becomes firmly fixed upon them and there is no hope of recovery.

Be wise in time: Hood's Sarsaparilla will cure, when in the power of medicine, scrotla, sair rheum, boils, pimples, dyspepsia, headache, billous-ness, catarrh, rheumatism, that tired feeling, and any disease or affection caused by impure blood or low state of the system.

Hood's Sarsaparilla

**FEVER and AGUE** Or CHILLS and FEVER.

AND ALL MALARIAL DISEASES. The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of KENT'S VEGETABLE FAMILY PILLS will be sufficient. USE no other pill.

# INVALIDS' HOTEL SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

## A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS,

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

## A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering humanity.

### NOT ALWAYS NECESSARY TO SEE PATIENTS.

By our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and familiarize them with our system of treatment, yet we have not seen one person in five hundred whom we have cured. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain signs. From these scientists deduce accurate concallusions regardless of distance. So, also, in medical science, diseases have certain unmistakable signs, or symptoms, and by reason of this fact, we are considered to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases, without seeing and personally

examining our patients. In recognizing diseases without a personal examination of the patient, we claim to possess no miraculous powers. We obtain our knowledge of the patient's disease by the practical application, to the practice of medicine, of well-established principles of modern science. And it is to the accuracy with which this system has endowed us that we owe our almost world-wide reputation of skillfully treating lingering or chronic affections. This system of practice, and the marvelous success which has been attained through it, demonstrate the fact that diseases display certain phenomena, which, being subjected to scientific analysis, furnish abundant and unmistakable data, to guide the judgment of the skillful practitioner aright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the casy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in "The People's Common Sense Medical Adviser." By R. V. Pierce, M. D. 1000 pages and over 300 colored and other illustrations. Sent, post-paid, for \$1.54. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular disease, will be sent you, with our terms for treatment and all particulars.

## COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such diseases than he who attempts to treat every ill to which flesh is heir, without giving special attention to any class of diseases. Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or

By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of every malady incident to humanity.

## OUR FIELD OF SUCCESS.

DISEASES OF DISEAS ten cents in postage stamps.

kindred maladies, have been very largely treated, and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients, who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of maladies as the old and ord-famed World's Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the exact nature of each case, and, hence, have been successful in nicely adapting their remedies for the cure of each individual case. BRIGHT'S DISEASE, DIABETES, and

These delicate diseases should be carefully treated These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and stage of advancement which the disease has microscopical examination of the urine, for medicines which are curative in one stage or condition are known to do positive injury in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only safe and successful course is to carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the disease and condition of our patient.

WONDERFUL
SUGGESS.

To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our institutions devoted exclusively to the treatment of diseases of the kidneys and bladder. The treatment of diseases of the urinary organs having constituted a leading branch of our practice at the Invalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a style to be easily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps.

BLADDER

BLADDER

BLADDER

BLADDER

BLADDER, STONE IN THE BLADDER, Gravel, Enlarged Prostate Gland, Retention of Urine, and kindred affections, may be included among those in the cure of which our specialists have achieved extraordinary success. These are fully treated of in our illustrated pamphlet on Urinary Diseases. Sent by mail for ten cents in stamps.

STRICTURE.

STRICTURES AND URINARY FISTULE.—Hundreds of cases of the worst form of strictures, many of them greatly aggravated by the careless use of instruments in the hands of inexperienced physicians and surgeons, causing false passages, urinary fistules, and other complications, annually consult us for relief and cure. That no case of this class is too difficult for the skill of our specialists is proved by cures reported in our illustrated treaties on these maladies, to which we refer with pride. To intrust this class of cases to physicians of small experience is a dangerous proceeding. Many a man has been ruined for life by so doing, while thousands annually lose their lives through unskillful treatment. Send particulars of your case and ten cents in stamps for a large, illustrated treaties containing many testimoniab.

RERVOUS

REPLIENT CONVUISIONS, OF Fits, Paralysis, Or Palsy, Locomotor Ataxia, St. Vitus's Dance, Insomnia, or inability to sleep, and threatened insanity, Nervous Debility, arising from oversitudy, excesses, and other causes, and every variety of nervous affection, are treated by our specialists for these diseases with unusual success. See numerous cases reported in our different illustrated

AND
LUNG DISEASES.

The treatment of Diseases of the Air Passages and Lungs, such as Chronic Nasal Catarrh, Laryngitis, Bronchitis, Asthma, and Consumption, both through correspondence and at our institutions, constitutes an important specialty.

We publish three separate books on Nasal, Throat and Lung Diseases, which give much valuable information, viz: (f) A Treatise on Consumption, Laryngitis and Bronchitis; price, post-paid, ten cents. (f) A Treatise on Chronic Nasal Catarrh; price, post-paid, ten cents.

Diseases of Women, Laryngitis and Bronchitis; price, post-paid, ten cents. (f) A Treatise on Chronic Nasal Catarrh; price, post-paid, ten cents. (g) A Treatise on Chronic Nasal Catarrh; price, post-paid, ten cents. (g) A Treatise on Chronic Nasal Catarrh; price, post-paid, two cents.

Diseases of Women, illustrated with numerous wood-cuts and propositions of the supplied of a case for consultation, so that we may know which one of our Treatises to send.

We have a special Department, theroughly organized, and devoted acclusively to the treatment of person, is given the most careful and considerate attention. Important cases (and we get few which have not already baffled the skill of all specialists. Rooms for indies in the invalids Hotel are very private. Send ten cents in stamps for our large Complete Treatise on Diseases of Women, illustrated with numerous wood-cuts and colored plates (100 pages).

HERNIA (Breach), or BUPTURE, no

HERNIA (Breach), or RUPTURE, no matter of how long standing, or of what size, is promptly and permanently cured by our specialists, without the knife and without dependence upon trusses. Abundant references, Send ten cents for RADICAL CURE OF RUPTURE.

Illustrated Treatise. PILES, FISTULÆ, and other diseases affecting the lower bowels, are treated with wonderful success. The worst cases of pile tumors are permanently cured in fifteen to twenty days. Send ten cents for Illustrated Treatise.

DELICATE
DISEASES.

Organic weakness, nervous debility, premature decline of the manly powers, involuntary vital losses, impaired memory, mental anxiety, absence of will-power, melancholy, weak back, and kindred affections, are speedily, thoroughly and permanently cured.

To those acquainted with our institutions, it is hardly necessary to say that the Invalids' Hotel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which arise from youthful indiscretions and permicious, solitary practices.

We, many years ago, established a special Department for the treatment of these diseases, under the management of some of the most skillful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced specialists.

We offer no apology for devoting so much

WE OFFER NO APOLOGY.

We offer no apology for devoting so much attention to this neglected class of diseases, believing no condition of humanity is too wretched to merit the sympathy and best services of the noble profession to which we belong. Many who suffer from these terrible diseases contract them innocently. Why any medical man, intent on doing good and alleviating suffering, should shun such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladies which afflict mankind there is probably none about which physicians in general practice know so little.

We shall, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these delicate diseases.

Clipper at Hose.

CURED AT HOME, at a distance just as well as if they were here

in person.
Our Complete and Illustrated Treatise (168 pages) on these subjects is sent to any address on receipt of ten cents in stamps.

SURGICAL
PRACTICE.

Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-specialists. Large Stones are safely removed from the Bladder, by crushing, washing and pumping them out, thus avoiding the great danger of cutting. Our specialists, remove cataract from the eye, thereby curing blindness. They also straighten cross-eyes and insert artificial ones when needed. Many Ovarian and also Fibroid Tumors of the Utcrus are arrested in growth and cured by electrolysis, coupled with other means of our invention, whereby the great danger of cutting operations in these cases is avoided.

Especially has the success of our improved operations for Vart-cocele, Hydrocele, Fistules, Ruptured Cervix Uteri, and for Ruptured Perineum, been alike gratifying both to ourselves and our patients. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the female generally resulting in Barrenness, or Sterility, and the cure of which, by a safe and painless operation, removes this commonest of impediments to the bearing of offspring.

A Complete Treatise on any one of the above maladies will be sent on receipt of ten cents in stamps. Hundreds of the most difficult operations known

ALL CHRONIC Stands we have in the preceding paragraphs, made mention of some of the special aliments to which particular attention is given by the specialists at the Invalids' Hotel and Surgical Institute, yet the institution abounds in skill, facilities, and apparatus for the successful treatment of every form of chronic aliment, whether re-
